

# Notes in MCEN 5115

Zahary Vogel

January 11, 2016

## First day

final project was to drive around a course and shoot some ping pong balls in a basket.

another was to collect a ball, and then shoot it at an enemy (ala Mario Kart).

Class is about systems integration.

Take home midterm, (really a long homework design project)

have syllabus in folder.

textbook is any edition of Scherz Practical electronics for inventors.

REading assignments from Scherz, skimming and such.

First reading assignment due Wednesday.

Graduate students have to do an extra thing. Either a 5 page research paper on some area of robotics and mechatronics (citations, etc). Other option is a small individual project. Present that project with a design summary.

Social style test
